IN THE ABSTRACT:

The Abstract as amended below with a replacement Abstract shows added text with underlining and deleted text with ~~strikethrough~~.

Please AMEND the Abstract as follows:

A server ~~for~~ performing a process corresponding to requests from a plurality of clients ~~that saves~~to eliminate a need for a user ~~the trouble of setting~~ to set an environment, which is ~~taken~~ generally required each time ~~he/she~~ the user moves to another client. An environment setting information storing section stores environment setting information ~~regarding~~ in relation to a client. A client specifying section specifies, ~~in the case of~~when a request for a process ~~having been~~is made from a predetermined client, the client which made the request. ~~An~~, and an environment setting section obtains environment setting information corresponding ~~to a~~ the client specified by the client specifying section from the environment setting information storing section and sets ~~the~~ a corresponding environment. ~~A~~Accordingly, a processing section performs a process corresponding to a request based on the ~~basis of an~~ environment set by the environment setting section.
